CUSTOM ASSEMBLY
NOTES:

TOTAL AMP LOAD: 76 Amps

TOTAL CFM Demand: 13 CFM

SAC aims to provide quality components at a fair price. We only source components that will provide years of satisfaction, not what is cheapest. We don't want to just sell you once, we want you to be a customer for life!

*Does not include Sales tax or delivery costs. Unless otherwise listed, delivery costs are billed at \$1.50 per mile.

**Quote is valid for 60 days

Warranty: SAC provides a 90 day warranty on labor and assembly of components. Manufacturer's warranty applies to individual components.

[1] > Gas Generator Will Not Work with E30 Models. Pair Gas Generators Only with E20 Models.
> If Shore Power Only is Selected We Can't Be Responsible for Future Generator Compatibility.

[2] > We Do Not Recommend a Mixing Chamber Larger than a 5252.
> Larger Mixing Chambers Consume More Air and Require More Flow (which means more heating demand); System May Not Support Larger Mixing Chamber Sizes.

[3] > E1 Electric Transfer Pumps are Only Compatible with R3 Elite Models.

[4] > Supplied Breathing Air System Must Be Paired with E1 Electric Transfer Pumps to Work. Air Compressor Does Not Have Enough Air to Supply Both Transfer Pumps + Supplied Air System.

[5] > Agitator/Mixer Cannot be Run at Full Speed While Spraying. Full Speed Uses 12 CFM. CFM Demand Calculated only half speed (6 CFM).
> For Open-Cell Foam that Requires Agitation, Run Agitator at Full Speed for 15-30 Mins, then Turn Speed to Half-Speed or Lower While Spraying.
